

Divyanshu Goyal

Noida • +91 63979 84019 • divyanshugoyal.dev@gmail.com • linkedin.com/in/imdivyanshu • github.com/thealoneshadow

Full Stack Developer with 4.5 years' experience building scalable AI-integrated apps using **React, Node.js, and GCP**. Specialized in **GenAI workflows** with **Gemini, Claude, OpenAI, LangChain**, and **RAG pipelines**. Delivered production-grade features with **30% faster load times**, **40% higher engagement**, and robust cloud deployments. Skilled in **vector DBs, prompt chaining**, and shipping **LLM-powered tools**. **Open to relocation** for AI-focused Full Stack roles globally.

WORK EXPERIENCE

Senior GENAI Full Stack Engineer • Noida, India

12/2023 - Present

EXL Service

- Designed and deployed LLM-integrated systems for healthcare clients using **Python, LangChain, Gemini**, and **GCP**.
- Built dynamic prompt templates, system messages, and fallback logic for **robust AI workflows** with **95%** response accuracy.
- Developed **microservices** in **Node.js and Express** for backend orchestration, **reducing latency by 30% using Redis caching**.
- Optimized **React components** for performance, **reducing load times by 20%** and enhancing user experience for a healthcare app.
- Implemented **indexing, sharding, aggregation pipelines**, and **db replication** to improve **scalability** and **performance by 18%**.
- Enhanced code quality and reduced bugs by **25%** through rigorous code reviews and implementing a test suite with **90%** coverage.
- Conducted **e2e testing, debugging**, and **refactoring** to enhance system **robustness**, reducing deployment errors using **Jenkins**.

Senior Full Stack Engineer • Mumbai, India

05/2023 - 11/2023

Rextone Digital (Startup ElRed)

- Architected a scalable backend system utilizing **Node.js, Express.js, AWS**, and **MongoDB**, **improving response time by 30%**.
- Managed **AWS CloudFront and serverless architecture**, **reducing development time by 50%** and **enhancing code quality**.
- Collaborated with product and design teams to deliver features that increased user satisfaction by **30%** and conversion rates by **15%**.

Full Stack Engineer • Full-time

11/2020 - 05/2023

CGInfinity & RidezNow

- Led an agile team delivering 30+ features bi-weekly, achieving 90% on-time project completion and improving performance by 18%.
- Designed and implemented efficient REST APIs, driving code quality improvements through detailed reviews with senior developers.

PROJECTS

Mr Coder AI WebApp Creator (Claude + Next.js)

05/2025

Built a **Claude 3.5-powered** AI assistant in Next.js that generates full-stack apps using **WebContainers**, replicating Bolt AI functionality.

AI Solution Vault (Next.js + MERN + AWS + ChatGPT)

03/2024

Developed an **LLM-powered** app using **Next.js, Node.js**, and **AWS with OpenAI and LangChain-based RAG pipeline** for context-aware search. Integrated **vector search, prompt templates**, and **system messages** to deliver personalized user responses.

SKILLS

- AI Skills** : OpenAI, Gemini, LangChain, Prompt Chaining, Retrieval-Augmented Generation (RAG), OpenAI Embeddings, Vector Search (FAISS, ChromaDB), Pinecone, Token Optimization, Function Calling, Multi-agent
- Frontend**: React.js, Next.js, TypeScript, Redux Toolkit, CSS, Webpack, Bootstrap, TailwindCSS, Responsive Designs, GraphQL
- Backend & Cloud**: Node.js, Express.js, NoSQL, MongoDB, Git, Python, Microservices, System Design, WebSockets, JavaScript
- Testing & DevOps**: Cypress, Jest, Unit Testing, Continuous Integration, Docker, Kubernetes, Monitoring, Containerization
- Professional**: Business Acumen, Agile Methodologies, Technical Communication, Code Reviews, Client Interaction, Jira, SOLID

CERTIFICATIONS

AWS Certified Developer Associate

01/2023 - 01/2026

Actively building and deploying LLM-based tools on AWS using Lambda, S3, and Bedrock

EDUCATION

Bachelor's Degree in Computer Science Engineering

Chitkara University (2018-2022)
