App Website Clone Project

ABOUT ME

Highly skilled Full Stack Developer with expertise in AngularJS, ReactJS, Redux, .Net Core, NodeJS, SQL, AWS Cloud, OpenAI, ExpressJS, TypeScript, GraphQL, Mongodb, and Github. A certified AWS Developer Associate with experience in developing secure web applications and portals. Seeking challenging remote opportunities in Full Stack development.

EXPERIENCE

Full Stack Developer | CGInfinity

04 2021 - Present

- Developed and deployed web applications using Angular, React, Express, NodeJS, MongoDB, SQL, and .Net Core
- Worked in an agile environment, collaborated with cross-functional teams, and delivered high-quality code on time

FitnessWithTanu/elRed | Freelancer

12 2020 - Present

- Developed and deployed web applications with Express, Node, MongoDB and React
- Creating a revolutionary startup from ideation to fruition that transcends industry standards and becomes a trailblazer in its field

MY PROJECTS

Flipkart Clone(MERN + AWS + ChatGPT) |  | 

11 2022 - 1 2023

- Developed the front end of the application using React and Redux, catering to both the Admin and User interfaces.
- Created Rest APIs for both the Admin and User interfaces using Node and Express.
- Leveraged AWS S3, EC2, and AWS Amplify for seamless image uploads and deployments
- Integrated Chat GPT to provide natural language product queries

Netflix Website 2.0 |  | 

11 2020 - 21 2020

- Designed and implemented the login functionality with Google security and database management for user credentials
- Developed a complete React, Redux, and Firebase-based project
